Lennox®
7 Series ductless
air conditioners
and heat pumps

Get year-round comfort anywhere you want

Lennox® 7 Series Ductless Mini-Split air conditioners and heat pumps provide a smart, energy-efficient way to cool or heat a specific room in your home. Maybe you have a sunroom that's just a little too warm in the summer and too cool in the winter. Or a room addition that isn't connected to your ductwork. Perhaps you have a media room that generates a lot of extra heat. Now, thanks to Lennox, any room can be comfortable any time of the year without a complicated installation.

A proud new addition to the Lennox family

For decades, Lennox has been trusted to deliver unsurpassed innovation in home comfort. Mini-Split air conditioners and heat pumps are no exception. **Each one is designed to deliver ultra-quiet comfort wherever you need it**—all in a small, attractive package that blends into any room. And with efficiency ratings up to 22 SEER and 10.20 HSPF, Mini-Split systems can keep you comfortable without generating high utility bills.

Smart, secure and very comfortable

When only certain rooms need cooling and heating, MS7C Mini-Split air conditioners and MS7H heat pumps provide an ideal solution. **Unlike window units, a Mini-Split system doesn't leave you vulnerable to insects, weather elements and theft.**

Designed for easy installation, Mini-Split systems use a compact indoor unit and an outdoor unit connected through a small hole in your wall. This not only helps keep your home secure, but it also allows the system to move heat out of your home quickly and efficiently, while using energy wisely. With an easy-to-use remote control, you can change the temperature to fit your comfort needs. It's just the kind of innovation you'd expect from Lennox.

Peace of mind from an industry leader

Mini-Split systems are built to Lennox' exacting standards, assuring you years of worry-free comfort. They're also backed by a 5-year limited parts and compressor warranty.* So you can rest easy. And comfortably.

rest easy and comfortably anywhere

A lot of comfort without a lot of noise

Every Mini-Split system creates an environment that is as quiet as it is comfortable. Considering a whisper is 20 decibels and light rainfall is 30 dB, Mini-Split air conditioners, **with indoor sound levels as low as 36 dB and outdoor levels as low as 63 dB, are hardly noticeable.** But the crisp, refreshing air is hard to miss.

Slow and steady keeps it efficient

Typically the air produced by a standard window unit blasts into your home at full force. Lennox® Mini-Split systems are different. Using inverter technology, these systems slowly ramp up to full speed, delivering only the air that is needed.

Lennox® 7 Series Mini-Split systems work great in any room.

- Sunrooms
- Media rooms
- Room additions/Bonus rooms
- Home offices
- Upstairs bedrooms

Cooling and heating—all in one

During warmer months, the Mini-Split heat pump works as a normal air conditioner. It extracts heat from inside the home and transfers it to the outdoor air. In colder weather, however, the process reverses—the unit collects heat from the outdoor air and transfers it inside your home, providing a much safer and more efficient solution than a traditional window-unit-and-space-heater combination.

The MS7C and MS7H may be eligible for government tax credits, as well as rebate programs from local utility companies. Please consult your tax advisor for more detailed information.

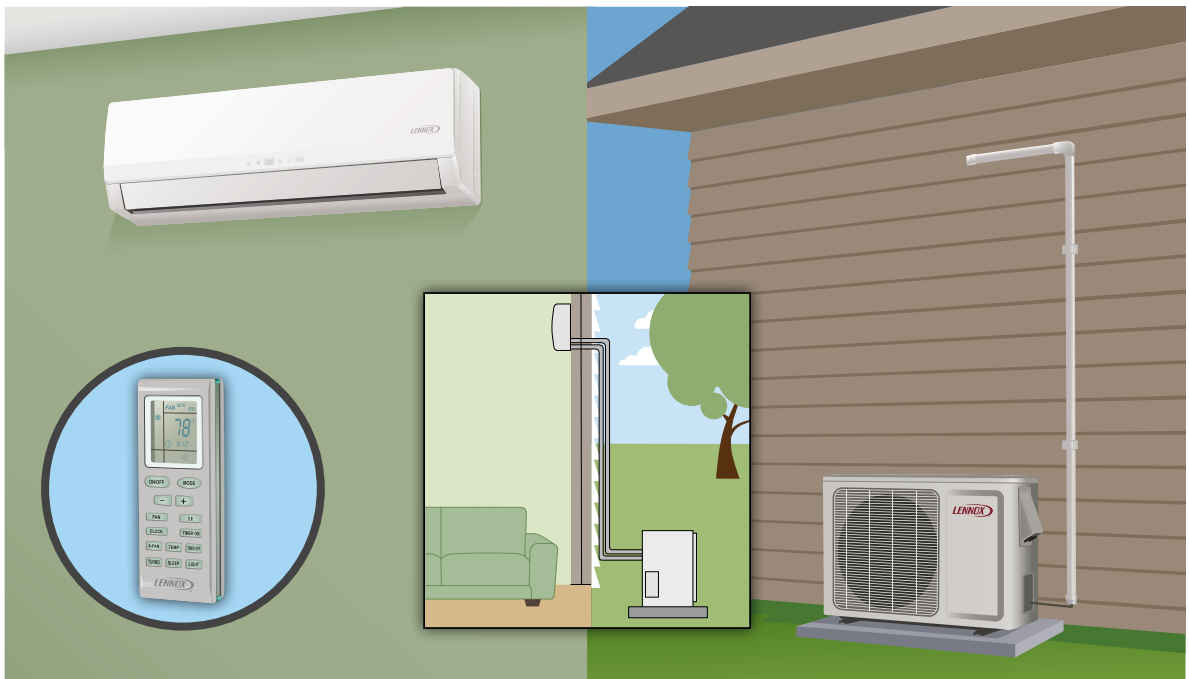

The MS7C and MS7H have earned the ENERGY STAR® label, which means they meet or exceed guidelines set forth by the U.S. Environmental Protection Agency.

Choosing an ENERGY STAR® qualified product like the MS7C or MS7H can improve your comfort, while also helping you save energy and money. For other ways to make your home more efficient, visit ItPaysToLiveSmart.com.
